Subject: Update of Barrett Staffing

Hi,

Just an email to let you know that in the morning meeting today I informed staff (Clinical Nurse, Allied Health and Teaching staff) that there will be a tour of the ward tomorrow morning; investigator at 0830 hours.

Teaching Staff and Allied Health proceeded to ask questions that I was not able to answer. I informed staff (Teaching and Allied Health) that I am not able to further comment and they are best speaking to their Line Manager. At this point in time collectively their anxieties became evident; they presented as anxious and angry.

Furthermore yesterday morning in Morning Meeting Teaching Staff asked about SW AETR meeting I attended. I told them that I was not able to provide information of content discussed or who was present at meeting.

I am wondering if Allied Health and Educations Line Managers could be contacted in order to provide support to staff.

Furthermore Occupational Therapists appear to be having difficulty communicating and this is evident in meetings and I am concerned it is going to impact on the care delivered to the adolescents.

Thank you for your time,

Vanessa.
