<b>Subject:</b> Rehabilitation Services	RE: FINAL Proposed service model elements for Adolescent Extended and					
Sorry Trevor,						
Just did a check of emails from yesterday and missed this one.						
It's been no problem at	all sitting on this group.					
More than happy to ass	sist in any way from here on in.					
Good luck!

Hello	
This is a personal reply, not to the group.	
Look forward to seeing you tomorrow.	
Kind regards,	
Trevor

Hi All,	

Apologies for a reply after the deadline – I was caught up yesterday.								
I'd also like to echo some of the thoughts of six months.	and others have raised in regards to the time limit							
Happy to discuss tomorrow.

Services

Dear Reference Group Members,

I firstly would like to thank the members of the ECRG for the opportunity to participate in the Group's deliberations. Irrespective of outcome, the intensity of effort and commitment to a better future for mental health challenged adolescents in Queensland by all ECRG members is inspiring.

I would like to make comment on the following two areas.

Firstly, with regard to time limitations - many adolescents have only started to settle into a facility such as BAC in the first six months. Only after that time and when the inpatient's condition is stabilised sufficiently can educational and social initiatives be introduced. These sometimes work on a two steps forward and one step back approach as well.

Any mandated time limit on admission risks failure for many patients.

Secondly, with regard to staff - commitment is the stand-out feature of the permanent staff at BAC.

Patients develop positive relationships with staff and anecdotally they will not interact with casuals to the same extent as permanent staff with whom they have a close rapport.

Any private service delivery organisation is under no requirement for consistency of staff. They will supply whom they presently have to hand. Their backgrounds may not necessarily be attuned to adolescents and their needs.

Kind regards,

From: Josie Sorban

Services

## Hi Ref Grp members

I think I got as much out of the comments by other members as the document itself. Extra thoughts I had was that defining the length of stay in Tiers 2 a&b makes the foci about school curriculum instead of the clinical and therapeutic milieu; also potentially disadvantage those commencing part-way through school term. Should be stated simply as months/weeks.

Note also the limitations of referral sources for Tier 2a - only CYMHS is listed, yet power-point and principles talk about collaboration with external services.

I remain concerned about the quality and capacity of the non-govt accommodation where minders are minimally trained - a far cry from the health-trained service in acute settings and BAC. The 4-bed week-end component of Tier 2b is far short of what currently available so wouldn't there be extra \$s until the Tier 3 can be achieved? Should we make a point for quarantining this money to contribute to a Tier 3 facility?

I agree with the corrections made by Michelle to the preamble, particularly the 3rd last paragraph which was confusing.

Agree with David re making a statement about the under-estimate using BAC wait-list as there are so many who don't get put on the wait list (once you hear how long it is) but would be ideal candidates for BAC treatment.

As Kev points out the objective was to replace existing BAC services, but in the Outcomes section of the document from Chris Thorburn, it appears to go broader, saying the endorsed model was to articulate a contemporary model(s) of care for extended treatment and rehabilitation for adolescents in Queensland and that the final endorsed model(s) of care will replace the existing services provided by BAC. We could make it clear that only Tiers 2b and 3 are the alternatives for current BAC funding?

Kev also mentions the threat to the teaching allocation of 10 bed proposal for Tier 3. I'm thinking this would be co-located with either an acute care unit or the day programme so

would still qualify for a f/t teacher? however the document does not address staffing numbers so this point can't be covered here.

Re Trevor's point about proximity to local community. Perhaps what we need to acknowledge that with the constraints of geographical distances ease of access is the next consideration. We have not made mention of a consideration for accommodating family to mitigate the family and community isolation for the adolescent. This would use up quite a bit of funds.

I look forward to further discussions on Wednesday.

Regards Josie
