Program/initiative	Adolescent Drug and Alcohol Withdrawal Service (ADAWS)	
Total funding	Contact Mater Children's Hospital for funding details	
Funding source	Department of Health	
Purpose of funding	ADAWS is a residential program for young people aged between 13 and 18 who are dependent on alcohol and/or other drugs, and want support for withdrawal from alcohol and/or drugs.	
Service model description	ADAWS is funded by the Department of Health and is provided under the auspice of Child and Youth Mental Health Services within Mater Health Services. ADAWS offers a residential treatment service for young people who are dependent upon alcohol or other substances. The residential program offers relapse prevention and life skills groups, recreational activities, individual and family counselling, and support to access practical assistance which includes housing, Centrelink, health and legal support. ADAWS also offers before and/or aftercare to the young person as well as to young people's families or carers.	
Target group	Young people aged 13 to 18 years	
Eligibility criteria	Young people aged 13 to 18 years who feel they have a problem with their alcohol and/or drug use and wish to have residential withdrawal support.	
Service locations (including catchments)	South Brisbane (but will provide services to any young person in Queensland who can access ADAWS).

Program/initiative	Regional Indigenous Youth Alcohol Other Drugs Treatment Services Network	
Total funding	\$1.14 Million in 2012/2013	
Funding source	Funded under the Closing the Gap strategy by the Commonwealth Government Department of Families, Housing, Community Services and Indigenous Affairs	
Purpose of funding	Funding is allocated to five youth services within the Non-Government and Government sector to enable those services to better service young people with alcohol and other drug issues.	
Service model description	The Regional Indigenous Youth Alcohol and Other Drugs Treatment Services Network provides an outreach/ in-reach model of service provision for Aboriginal and Torres Strait Islander young people aged 12 to 17 years old who have substance misuse problems as a means of linking them to an integrated system of care and support. Clients under this initiative are referred into appropriate treatment programs with the aim of curbing and addressing these issues at an early onset. Services models under this initiative are varied in response to local identified needs.	
Target group	Young people aged 12 to 17 years.	
Eligibility criteria	Aboriginal and Torres Strait Islander young people aged 12 to 17 years old who have substance misuse problems	
Service locations (including catchments)	Services are located in Cairns (ATODS), Townsville (ATODS), Mount Isa (ATODS), Cherbourg (ATODS) and Gold Coast (Gold Coast Drug Council).

Adult mental health programs and services

Service type	Acute care teams (ACT)
Total funding	Contact HHS
Funding source	Department of Health
Purpose of funding	ACT function as the first point of contact to public mental health services 24 hours, 7 days a week. Following triage, they facilitate the most appropriate type of care (e.g. inpatient, community, crisis interventions) for the individual.
Service model description	 The key functions of the ACT are: facilitation of 24 hour, 7 days a week access to the most appropriate mental health care provision of a centralised co-ordinated triage component to the mental health service timely assessment and clinical interventions that lead to initial recovery planning, including relapse prevention and implementation for community consumers presenting with acute mental health needs.
Target group	The general public can access the triage function of an ACT (where the service is available) to discuss a mental health concern or problem. Following triage the ACT may facilitate the referral of the consumer to a more appropriate internal and/or external service such as a community mental health team, an alcohol and drug service or primary health care. If referred by triage the ACT will provide an assessment and/or time limited interventions. Local protocols may require that consumers of particular age groups (children, adolescents, older adults) are referred on to age-specific services once triage has been completed by ACT. A range of other factors (e.g. cultural appropriateness) will also be considered with respect to the onward referral process. The ACT primarily focuses on the acute care needs of newly referred adult consumers to the service, within service provision parameters and service capability
Eligibility criteria	The general public can access the triage function of an ACT (where the service is available) to discuss a mental health concern or problem. Referrals can be made by any person, including the consumer, carer, family, friends and other service providers. Referrals from other districts will be triaged and collated from ACT services in the receiving district to ensure consistency of service provision. When a person is referred without their knowledge or consent, triage will proceed as clinically indicated, as per mental health statement of rights and responsibilities, and the <i>Mental Health Act 2000</i> .
Service locations (including catchments)	Not all HHS will have a designated ACT however, all HSDs will have a mechanism for providing 24 hour, 7 days a week access to mental health care.
Is the program/initiative currently under review?	☐ Yes ☑ No
Is the program/initiative likely to be expanded in the future?	✓ Yes☐ No☐ Uncertain

Service type	Community care teams (CCT)
Total funding	Contact HHS
Funding source	Department of Health
Purpose of funding	CCT are provided to persons in the community, 18 years and over (16 years and over if living independently) who are affected by mental illness and who would benefit from a

	multidisciplinary service due to the intensive or complex nature of the care required. The majority of CCT consumers experience moderate to severe impairment in functioning due to mental illness, and have difficulty accessing and maintaining psychosocial supports which facilitate community inclusion and maintain social functioning. Individuals engaged with CCT services may have diagnoses such as schizophrenia, psychosis, severe personality disorder and affective disorders complicated by co morbidities including substance misuse and personality disorders.	
Service model description	 The key functions of CCT are: provision of assertive, recovery-oriented assessment and clinical interventions that minimise the impact of mental illness on consumers, their family/significant others and carers, who are living in the community facilitation of access to a broad range of clinical and non-clinical services to enable consumers to establish, re-establish or reclaim a meaningful life working in partnership with consumers to develop their personal support systems and to participate fully in their communities engagement with non-government organisations, primary care and other service providers to enable access to early intervention in the recovery continuum. 	
Target group	CCT are provided to persons in the community, 18 years and over (16 years and over if living independently) who are affected by mental illness and who would benefit from a multidisciplinary service due to the intensive or complex nature of the care required.	
Eligibility criteria	Contact ACT within HHS regarding access to CCT.	
Service locations (including catchments)	Contact HHS for service locations, including catchment areas.

Service type	Adult acute inpatient mental health services	
Total funding	Contact HHS	
Funding source	Department of Health	
Purpose of funding	Mental health care for adults who are experiencing an acute episode of mental illness.	
Service model description	Adult acute inpatient mental health units (AAIMHU) provide short to medium term 24 hour inpatient assessment and treatment services for adults experiencing serious episodes of mental illness, who cannot be adequately supported in the community environment. The core business of adult acute inpatient services is to provide multidisciplinary specialist assessment, collaborative treatment, evidence based, best practice and skilled clinical interventions, clinical reviews and discharge planning within a safe, therapeutic and consumer friendly environment.	
Target group	AAIMHU are designed to provide care to all people between the ages of 18 and 64, who are experiencing an acute episode of mental illness with or without associated behavioural disturbance.	
Eligibility criteria	Admission occurs after a comprehensive clinical mental health assessment. Referrals are made from within the public mental health system, including through Acute Care Teams and community mental health teams.	
Service locations (including catchments)	 Cairns HHS (Cairns Base Hospital) Central Queensland HHS (Rockhampton Hospital) Darling Downs HHS (Toowoomba Hospital) Fraser Coast HHS (Bundaberg Base Hospital) Gold Coast HHS (Gold Coast Hospital – Robina and Southport Campuses) Mackay HHS (Mackay Base Hospital)

Service type	Extended inpatient adult mental health services – Secure mental health rehabilitation units (SMHRU)
Total funding	Contact HHS
Funding source	Department of Health
Purpose of funding	SMHRU are health facilities that provide a safe and structured environment and 24 hour clinical support for adult consumers generally over the age of 18 years with persistent and disabling symptoms of mental illness. Inpatient treatment and rehabilitation is provided on a medium to long term basis, however SMHRU may also accept consumers for short term inpatient treatment and stabilisation where the consumer has been difficult to treat in less restrictive settings.
Service model description	 The key functions of SMHRU are: provision of extended-care mental health inpatient services 24 hours, 7 days a week in a specialised secure environment, to consumers who are unable to be provided with clinical services in a less restrictive setting. provision of contemporary, high quality, multi-disciplinary rehabilitation services to assist consumers to recover from mental illness and to gain skills needed to live in a less restrictive setting.
Target group	SMHRU are intended to target adults over the age of 18 who have complex needs who are unable to be adequately treated in less restrictive settings, due to symptoms of mental illness, and associated issues of behaviour and risk which indicate a need for rehabilitation. SMHRU may be provided to individuals under 18 years of age, who cannot be safely managed in less restrictive settings.
Eligibility criteria	Referral is made from within the public mental health system.
Service locations (including catchments)	 SMHRU are located at: Metro North HHS (Caboolture Hospital) Metro North HHS (The Prince Charles Hospital) Darling Downs HHS (Baillie Henderson Hospital – Toowoomba) Townsville HHS (Townsville Hospital) West Moreton HHS (The Park, Centre for Mental Health – Wacol).
Is the program/initiative currently under review?	☐ Yes ☑ No
Is the program/initiative likely to be expanded in the future?	Yes No Uncertain

Service type	Extended adult inpatient mental health services - Community Care Units (CCU)
Total funding	Contact HHS

Funding source	Department of Health
Purpose of funding	CCU are community based residential facilities for adult mental health consumers who are in recovery, but require additional support and life skills to successfully transition to independent community living. CCU aim to promote an individual's recovery by providing opportunities that maximise their strengths and potential, supported by 24 hour clinical care and supervised residential rehabilitation.
Service model description	 CCU provide both clinical interventions and an opportunity for consumer to learn or relearn living skills to enhance their capacity to live independently in the community. The key functions of the CCU are: provision of 24 hour mental health clinical care and rehabilitation for consumers with complex mental health needs and associated disabilities. facilitation of living skills development in a community residential facility setting over a medium to long term time frame engagement of consumers to develop sustainable relationships with family/carers or other supports to enable meaningful participation in their own community.
Target group	CCU services are provided to consumers aged 18 years and older who would benefit from 24 hour residential care for a mental illness or severe mental health problems, with persistent symptoms that substantially impair psychosocial function and the capacity for independent living. These consumers have, or are likely to have, difficulty functioning within their community and have had problems accessing other services for support.
Eligibility criteria	Referral is made from within the public mental health system.
Service locations (including catchments)	 Gold Coast HHS: Gold Coast Hospital – Robina Campus. Metro North HHS: Somerset Villas CCU (Brisbane); Redcliffe – Caboolture CCU and Pine Rivers CCU) Metro South HHS (Redland Bay, Logan and Coorparoo) Sunshine Coast HHS (Mountain Creek CCU) Townsville HHS (Charters Towers Rehabilitation Unit and Kirwan Mental Health Rehabilitation Unit) West Moreton HHS – The Park Centre for Mental Health Cairns and Hinterland HHS – Cairns.
Is the program/initiative currently under review?	☐ Yes ☑ No
Is the program/initiative likely to be expanded in the future?	Yes* No Uncertain
Comments	*The Queensland Government has received funding from the Commonwealth Government to undertake capital works for the establishment of four new CCU's in Queensland, planned for Toowoomba, Rockhampton, Sunshine Coast and Bundaberg.

Service type	Extended adult inpatient mental health services – Mental Health Acquired Brain Injury Units (MHABIU)
Total funding	Contact HHS
Funding source	Department of Health
Purpose of funding	MHBIU provide clinical care and residential rehabilitation for adults over 18 years of age whose level of mental illness and disability requires a structured living environment with clinical treatment and supervision available 24 hours a day.
	The service is targeted to provide medium term care and rehabilitation for consumers who are unable to be supported to live within other less intensive community residential options.
	MHABIU aim to facilitate an individual's recovery from mental illness by providing opportunities that maximise a person's strengths and potential, thus enhancing their quality of life. A multidisciplinary team supports consumers to acquire and maintain daily living skills and increase their capacity and confidence to function as members of

	the community. MHABIU provide or coordinate a range of recovery focused programs aimed at the consumer's clinical treatment and rehabilitation needs. Some consumers will benefit from a period of intensive rehabilitation before moving to more independent living. Others may require a highly supervised supportive environment for an extended period to assist in managing their complex clinical and behavioural needs.
Service model description	MHABIU are targeted at people with a mental illness who also have an acquired brain injury and require 24-hour clinical care. While it is acknowledged that a number of consumers will require this level of support and supervision for a number of years, it is envisaged that consumers will move through the units to other community residential options.
Target group	Adults over 18 years of age who have a mental illness who also have an acquired brain injury and require 24 hour clinical care. Typically, consumers will have significant symptomatology associated with their mental illness that may be slow to respond to treatment. Often, consumers will also experience behavioural disturbances or physical disabilities that make community based care in alternative supported accommodation options difficult.
Eligibility criteria	Referral occurs from within the Queensland public mental health system.
Service locations (including catchments)	Darling Downs HHS, Baillie Henderson Hospital (Toowoomba) Metro North HHS, The Prince Charles Hospital – Jacana ABI Unit (Chermside) Metro South HHS, Casuarina Lodge – Wisteria Acquired Brain Injury Unit (Bayside) Townsville HHS, Kirwan Mental Health Rehabilitation Unit (Kirwan).

Service type	Court liaison services (CLS)
Total funding	Contact HHS
Funding source	Department of Health
Purpose of funding	To provide mental health advice, assessments, referral and diversion for people with identified mental health concerns who are involved in the criminal justice system (CJS).
Service model description	 The key functions of CLS are to: provide clinical assessment, liaison, support and advice to individuals for whom there are mental health concerns while in custody or appearing in court. provide liaison, support and advice to other government and non-government departments, agencies or individuals involved in providing service to these individuals. identify and refer/divert individuals involved with the CJS who have mental health needs to the most appropriate service (eg. to district mental health services for assessment and/or treatment, or to ATODS services). ensure that individuals with mental health needs who remain in custody receive appropriate care and follow up by referring to the appropriate services (eg. Forensic medical officer, PMHS, watch house staff and alcohol and drug services where available. ensure, in collaboration with PMHS, people who are open clients of PMHS and who are released to the community through court have appropriate mental health follow up plans in place.
	 notify the courts and district mental health services of individuals with mental health needs who may require special consideration in relation to their charges. This function is also performed for consumers of the Forensic Disability Service whose care is regulated under the Forensic Disability Act 2011.
	 provide advice and/or education to the registrar of the court regarding issues related to mental health and the application of the Mental Health Act 2000 (MHA)

	2000).
	 provide advice and clarification to individuals due in court, their relatives/carers or legal representatives about issues related to mental health and MHA 2000.
Target group	CLS provide services to people aged 17 years or older who have a suspected or diagnosed mental illness and who are involved in the CJS, in particular those appearing before the court for determination of charges, committal for trial or for sentencing, or in police custody. The service will also attempt to facilitate a specialist assessment for people who are under 17 years of age who are in custody and appear to have mental health concerns.
Eligibility criteria	 CLS have an open referral policy. In addition to this the CLO will routinely see: a person who is charged with specific serious charges, open clients of Queensland public mental health services people returning from prison to court where there is a recommendation under MHA 2000 in force people who are suicidal
Service locations (including catchments)	CLS operate in many magistrates courts across Queensland. Contact the State-wide Forensic Mental Health Service for details regarding CLS locations and catchment areas.

Service type	Prison Mental Health Services (PMHS)
Total funding	Contact HHS
Funding source	Department of Health
Purpose of funding	PMHS provide a multidisciplinary in-reach mental health service to people who are affected by mental illness and are currently incarcerated in Queensland correctional centres. The PMHS is a state wide service encompassing a number of local services located within the relevant Health Service Districts.
Service model description	 The key functions of the PMHS are: providing a triage function to identify mental health needs of those in custody providing quality mental health care to those in custody including ongoing assessment of mental health needs and provision of holistic care facilitating continued access to mental health services (as required) upon release from custody providing intensive assistance to individuals with complex mental health needs who are integrating back into the community supporting affiliated organisations to assist in meeting the mental health needs of consumers through the provision of education and training; and establishing partnerships with community and government organisations to assist in better meeting the needs of consumers.
Target group	The target population for the PMHS is any person in a Queensland correctional centre who requires mental health assessment and/or specialised treatment for a mental illness. Services are provided irrespective of the individual's correctional status; as such PMHS caters for remandees and sentenced prisoners. In addition to this, PMHS provides services to young people aged 17 and above who are accommodated in adult correctional facilities.
Eligibility criteria	Anyone in a Queensland correctional centre who requires mental health assessment and/or specialised treatment for a mental illness.
Service locations (including catchments)	The PMHS provides an on-site service to many Queensland correctional facilities. Additionally, PMHS provides care to existing patients of the service who are transferred to low security facilities but require ongoing mental health involvement. As no on-site mental health services are provided at these low security facilities, consumers may be transported to a secure prison facility to receive services as required.
	Contact the State-wide Forensic Mental Health Services for exact locations and

Service type	High Secure Inpatient Service (HSIS)
Total funding	Contact West Moreton HHS
Funding source	Department of Health
Purpose of funding	HSIS provides services for adults (aged 18 and 64) who have complex mental health needs and associated risks which require assessment and treatment within a high secure environment.
Service model description Target group	The HSIS is a state-wide service that provides a highly supervised, supportive and secure environment for individuals who have been involved with, or are at risk of involvement with, the criminal justice system and who have complex mental health needs requiring assessment and/or treatment and rehabilitation. HSIS exists for consumers who, by the nature of their serious and violent offences and assessed level of risk to others, are unable to be supported within a less restrictive environment. The key functions of HSIS are: To provide 24 hour, seven days per week mental health care and rehabilitation services to consumers. The delivery of treatment programs which aim to support consumers in achieving rehabilitation and recovery goals and minimise risk of re-offending. HSIS provides services for adults (aged 18 and 64) who have complex mental health needs and associated risks which require assessment and treatment within a high
	secure environment.
Eligibility criteria	Referral is made from within the public mental health system.
Service locations (including catchments)	The Park, Centre for Mental Health, Wacol. This is a state-wide service.
Is the program/initiative currently under review?	☐ Yes ⊠ No
Is the program/initiative likely to be expanded in the future?	Yes No Uncertain

Service type	Extended Forensic Treatment and Rehabilitation Unit (EFTRU)
Total funding	Contact HHS
Funding source	Department of Health
Purpose of funding	The EFTRU is a supervised hospital based residential setting for mental health consumers (aged 18 years and older) transitioning out of the High Security Inpatient Service (HSIS). The service aims to support consumers in their recovery and rehabilitation as they transition towards community living.
Service model description	EFTRU services are provided to consumers aged 18 years and older who no longer require a high security inpatient setting but need ongoing treatment and rehabilitation in an extended forensic inpatient environment, not able to be provided in the community. These consumers have complex needs and are either, undertaking community reintegration or require further support to develop living skills beyond high security and as close to the community as possible. The key functions of the EFTRU are: Balancing forensic mental health rehabilitation services within a contemporary risk management framework that promotes recovery of the consumer and community protection.

	 Provision of individualised, group programs and clinical interventions consistent with the consumers' recovery goals and risk management plans that support progression towards community transition, Providing an appropriate mix of environmental, relational and procedural security within a residential inpatient service.
Target group	Consumers (aged 18 years and older) transitioning out of the HSIS.
Eligibility criteria	Internal referral from with the public mental health system (specifically the HSIS).
Service locations (including catchments)	The Park, Centre for Mental Health, Wacol. State-wide service.

Adult alcohol and drug programs and services

Service type	Alcohol, Tobacco and Other Drug Services (ATODS)
Total funding	Contact HHS
Funding source	Department of Health and individual Hospital and Health Services
Purpose of funding	To provide a comprehensive response to the different and varying needs of people of all ages experiencing problems related to substance use.
Service model description	Alcohol and drug services provide treatment to individuals or families who require assistance for their own or someone else's alcohol and/or drug use, within a harm minimisation framework. Treatment is appropriately matched to the client's needs and may include assessment, counselling, motivational enhancement therapy, referral, aftercare, group work, withdrawal management, opioid replacement and distribution of clean injecting equipment and information.
Target group	Any person concerned about their own or someone else's substance use. ATODS accepts referrals from people of any age but most services don't have clinicians with specific skills in working with young people.
Eligibility criteria	A clinical decision is made at intake as well as with the client, regarding the most appropriate service and/or treatment type to meet the needs of the person.
Service locations (including catchments)	All 17 Hospital and Health Services provide dedicated ATODS. Most of these ATODS provide a 'hub and spoke' model such as outreach, satellite services and fly-in/fly-out arrangements. Contact HHS for exact location and coverage of services.

Program/initiative	Mirikai Therapeutic Community
Total funding	Contact Mirikai for details
Funding source	Department of Health and the Commonwealth Department of Health and Ageing
Purpose of funding	Residential rehabilitation program for clients aged 18-29 years old and who have complex problems associated with their drug use, including mental health issues. Clients aged 16-18 may be accepted in exceptional circumstances when referred by a health or welfare professionals.

Service model description	Mirikai works on a Therapeutic Community model whereby the goal is to enhance the capacity and commitment of clients to achieve, as well as maintain an optimal level of personal and social functioning free from problematic substance use. Residential rehabilitation works on a staged approach with each stage of different length. Successful completion of each stage is a necessary pre-requisite for progress onto the next. The total residential program takes about six months to complete. The last stage, 're-entry to the community' through one of the aftercare houses lasts around six months, depending on the individual. For clients with a dual diagnosis, tailored educational and social activity programs have been developed to support them through the program.			
Target group	Young people aged 18 -29, with consideration given to 16-18 year olds where required. Mirakai specialises in individuals with complex problems associated with alcohol or other drug use, including mental health problems.			
Eligibility criteria	Application for admission can be made in person or by phoning Mirikai. Suitable applicants will undergo a comprehensive assessment by staff.			
Service locations (including catchments)	Burleigh Heads			
Is the program/initiative currently under review?	☐ Yes ☑ No			
Is the program/initiative likely to be expanded in the future?	☐ Yes ☐ No ☑ Uncertain			

Service type	Adult residential rehabilitation services			
Total funding	\$12.6 Million in 2012/2013			
Funding source	Department of Health and Department of Health and Ageing.			
Purpose of funding	To provide alcohol and drug treatment to people presenting with problems related to alcohol and other drugs use.			
Service model description	Residential rehabilitation is a well established form of treatment. Residential rehabilitation programs are structured live-in programs suitable for people who experience more severe or dependant level alcohol and/or drug use. Some Residential services in Queensland also provide withdrawal management and support services to people experiencing mild to moderate withdrawal symptoms. Many of the Residential services are funded to provide services to people referred			
	through the Courts such as drug diversion programs.			
Target group	Generally people aged over 18 experiencing problems related to alcohol and/or other drug use. Usually the substance use has been more problematic, longer-term and/or out-client counselling has not previously worked for the person.			
Eligibility criteria	Generally people aged over 18 who are concerned about their alcohol and/or drug use			
Service locations (including catchments)	 Alcohol and Drug Foundation of Queensland Logan House - Logan Gold Coast Drug Council – West Burleigh Goldbridge – Southport Ozcare – Cairns, Townsville, Mackay, Ipswich, Coorparoo, Taringa St Vincent de Paul - Auchenflower Salvation Army – Red Hill, Townsville, Southport Stagpole St - Townsville Gindaja - Yarrabah We Help Ourselves - Nambour Most of these services accept referrals from people living anywhere in Queensland or Northern New South Wales but please contact individual services for details regarding service catchment areas.

Service type	Queensland Illicit Drug Diversion Initiative (QIDDI)		
Total funding	Contact HHS		
Funding source	Department of Health		
Purpose of funding	QIDDI was a joint Commonwealth-State initiative aimed at diverting illicit drug offenders into treatment. QIDDI consists of the Police Diversion Program and the Illicit Drugs Court Diversion Program. The program offers professional health interventions to people arrested for first-time minor drug offences and provides them with an incentive to address their drug use early, and in many cases, before incurring a criminal record. Under the Police Diversion Program, people who are found in possession of 50 grams or less of cannabis are offered the opportunity to attend a Drug Diversion Assessment Program (DDAP) rather than being charged for the offence.		
	The Illicit Drugs Court Diversion Program is aimed at diverting all eligible individuals who appear in any Queensland Magistrates Court or any Queensland Children's Magistrates Court charged with possession of a small amount of an illicit drug and/or utensil for personal use. Attendance at the session means that no conviction is recorded.		
Service model description	Clients are required to attend a confidential 2 hour assessment and education session with a QIDDI counsellor. Based on the assessment, clients may be referred to other services such as out-client support, counselling, or residential treatment or the QIDDI counsellor can provide ongoing individual counselling.		
Target group	Clients from 10 years and over who've been offered drug diversion. Most services don't have clinicians with specific skills in working with young people, although around 55% of diversion clients are people aged under 25.		
Eligibility criteria	Anyone who meets the strict eligibility criteria for Police Diversion or Illicit Drugs Court Diversion will be referred by Police or Magistrates.		
Service locations (including catchments)	Services are located across Queensland and are provided by both ATODS within Queensland HHS and non-government organisations.		
Is the program/initiative currently under review?	☐ Yes ☑ No		
Is the program/initiative likely to be expanded in the future?	☐ Yes ☐ No ☑ Uncertain		

Service type	Queensland Courts Referral
Total funding	\$5,548,279
Funding source	Department of Health
Purpose of funding	Queensland Courts Referral (QCR) is a process which engages with non-government organisations and government agencies to address the causes of offending behaviour by assisting defendants with drug and/or alcohol use, mental illness, intellectual disability, cognitive impairment, and homeless people or those at risk of homelessness who come into contact with the criminal justice system. The aims of QCR are to: • provide short term assistance to defendants appearing on charges who have a health and/or social problem through referral to treatment or community support services; and • reduce long term re-offending.
Service model description	QCR currently only operates in the Brisbane Magistrates Court. Magistrates, in the normal conduct of the Court and having regard to the provisions of
	the Bail Act 1980, may grant bail and impose conditions under s 11(2) of the Bail Act

	1980 and/or impose a condition under s 11(9) that the defendant participate in a rehabilitation, treatment or other intervention program. A program may be attended through QCR while the defendant is on bail and subject to reporting, residential or other special conditions.		
Target group	Over 18 years, defendants with drug and/or alcohol use appearing in the Magistrates Court.		
Eligibility criteria	A defendant must be on bail or be eligible for bail to Participate in QCR. A defendant whose charges include a charge that can only proceed by indictment is ineligible to participate in QCR. The QCR Facilitator will complete an initial Screening and Referral Form (SRF) to identify potential candidates. The Case Assessment Group (the CAG) will then determine whether it is appropriate for a service to be provided to a defendant. The QCR Facilitator will make recommendations to the Magistrate about whether or not the defendant is suitable to engage with the QCR.		
Service locations (including catchments)	Brisbane with possible roll-out to Cairns, Townsville and Rockhampton by September 2013 and negotiations have commenced in Ipswich, Mt Isa and Beenleigh.		
Is the program/initiative currently under review?	☐ Yes ☑ No		
Is the program/initiative likely to be expanded in the future?	Yes No Uncertain		

Service type	Queensland Magistrates Early Referral into Treatment (QMERIT)			
Total funding	\$2 Million per annum			
Funding source	Department of Health			
Purpose of funding	QMERIT is a pre-sentence diversion program which is aimed at people at an early stage in the criminal justice process. QMERIT allows the Courts to be flexible by being able to offer people the option of voluntary participation in treatment for their substance use, prior to sentencing. Individuals who are charged with drug-related offences are encouraged to undergo assessment and treatment for their illicit drug use while they are on bail. A person granted bail and agree to participate in the QMERIT Program under Section 11 of the <i>Bail Act 1980</i> .			
Service model description	QMERIT is based on partnerships of health professionals case managing participants through a treatment regime that lasts approximately four months. Clients formally admitted into the QMERIT Program return regularly to court at the discretion of the magistrate. Treatment may include assessment, counselling, withdrawal management, residential rehabilitation, Opioid treatment and aftercare.			
Target group	People aged 18 years and over who are charged with drug-related offences and are granted bail and agree to participate in QMERIT			
Eligibility criteria	Anyone who meets the strict eligibility criteria for QMERIT including voluntarily agreeing to participate.			
Service locations (including catchments)	Redcliffe and Maroochydore Magistrates Courts. Case managed by HHS QMERIT case managers at Redcliffe and Maroochydore. Residential services located at Logan, Red Hill and Nambour.			
Is the program/initiative currently under review?	☐ Yes ☑ No			
Is the program/initiative likely to be expanded in the future?	YesNoUncertain

DDGHSCI

Title: Mapping of Queensland Government Services for Young People

The Department of Communities, Child Safety and Disability Services (DCCSDS) has requested information from the Department of Health on services provided to young people aged 12 to 25.

This information will be used by the DCCSDS in a project they are conducting on the recommissioning of funded non-government organisations that provide services to young people.

The Department of Health response is at Attachment 1. DDGHSCI clearance to provide this information to DCCSDS is required.

Contentious Issues

Comments from DDG HSCI:

Information provided to the DCCSDS notes that our mental health non-government organisations are being funded for a further six months. Further funding will be dependent on a review of community mental health programs.
