Yes we will need to closely monitor as more than a few patients could really chew up your resources

Hi Bronwyn

Thank for that. It is hard to predict but our thoughts are that there will not be much call on this (if any) because of a range of things being developed. We could be proved wrong of course.

Thanks
Regards

Erica

Hi Erica

As discussed the "quote" looks fine, noting that this is the expected cost above the baseline MH beddays that are funded into the QH contract.

Should significant volumes of these patients appear and start pushing the MH inpatient service over the baseline purchased activity level we would have to revisit this approach.

For now though I think it is fine to go

Thanks
Bronwyn

Hello Bronwyn

Please find attached the costings that Mario has developed. The costs are in addition to the normal bed costs that we receive funding for.

Brett has been asked to send this quote to CHQ. Any suggestions before it goes?

Thanks
Erica

Subject: Barrett Centre patient "Quote"

Hi Erica

Just checking in on this one as discussed at MCH Exec – can you let me know when the “quote” will be ready for review – want to be on the front foot and have this all sorted and not be doing it when we actually have a patient ?

Thanks !
Bronwyn
